

Environmental Statement

Commitment

We are very conscious of the need to protect the Environment from further damage as a result of our operation. We are committed to continually improve our understanding and methods thus achieving the high standard of environmental performance.

We acknowledge that our operations have a direct and indirect environmental impact and aim to minimise them and operate in an environmentally responsible manner.

General Policy

We believe that a sensitive and good management approach to these matters will reduce the impact of our operations on the Environment to the benefit of everyone. It is responsibility of each employee to incorporate and improve the practices within our organization to have clean air, safe water and adequate resources. The very nature of our Construction Operations inevitably creates dust, noise, material wastes, gaseous emissions and potential water wastage, all of which need to be assessed and controlled. A proactive approach will be taken in ensuring the environmental damage is minimised during our works and that appropriate steps are taken to prevent pollution.

Statement of Principles. Jaymel Airconditioning undertake to:

- Ensure environmental risks are properly defined, prioritised and managed in an appropriate and timely manner.
- Establish sound environmental policies and promote best practice.
- Set environmental objectives and targets, the implementation of which will aid the reduction of our environmental impacts.
- Manage our operations in ways that are environmentally sustainable and economically feasible, by making efficient and responsible use of energy and water and exploiting opportunities to maximise efficiency.
- Minimise waste production by reduced consumption and develop effective waste management and recycling procedures.
- Develop policies to raise and maintain awareness amongst staff and promote individual good practice and encourage team participation.
- Communicate this policy to all employees, external bodies or the public on request.

This policy will be reviewed annually. All our operatives will be made aware of this policy at their induction training on commencement of their employment and with subsequent Tool-Box Talks.

D. Stefanac

Managing Director
